

A Celebration of CEMP and Gala of GALAH

Hosted by Monash University, co-sponsored by JINA-CEE

Melbourne, Australia

Nov. 13 - Nov. 17, 2017

Meeting organizers: Amanda Karakas: amanda.karakas@monash.edu

Timothy Beers: tbeers@nd.edu

This meeting will consider two broad themes:

Our present understanding of the Carbon-Enhanced Metal-Poor (CEMP) stars in the halo of the Milky Way, and their constraints on nucleosynthesis by the first generations of stars, on the 25th anniversary of their discovery.

and

First science results based on DR1 from the GALAH survey --
the first massive high-resolution optical survey of stars in the Milky Way,
now underway at the AAT.

First announcement circular and website with information for anticipated participants
will be circulated shortly. Be sure to set aside the date if you think
