

Postdoctoral Research Associate Positions at Princeton University

The Physics Department at Princeton University expects to have postdoctoral or more senior positions available in Theoretical Gravitational Physics, broadly defined, nominally starting September 1, 2018.

The initial appointment will be for one year, with renewal contingent on continued funding and satisfactory performance. A Ph.D. in Physics, Astrophysics, or a related area at the time the appointment begins is required.

The successful candidate's research will focus on topics related to gravitational physics. This could include studies of astrophysical sources of gravitational waves and their possible electromagnetic counterparts, black hole formation, high-speed black hole collisions, the nature of singularities, early universe cosmology, and gravity in higher dimensions.

Applications will begin to be reviewed on January 1, 2018.

To apply for this position please [visit the website](#). There, you may upload a recent CV, research statement and contact information for three referees who will be solicited to provide letters of support.

For more information please contact Frans Pretorius at fpretori@princeton.edu.

This position is subject to the University's background check.

Princeton University is an Equal Opportunity/Affirmative Action Employer and all qualified applicants will receive consideration for employment without regard to age, race, color, religion, sex, sexual orientation, gender identity or expression, national origin, disability status, protected veteran status, or any other characteristic protected by law.
