**Subject:** [JINA-CEE News] Theoretical astrophysics postdoctoral position

Dear Colleagues,

The theoretical astrophysics group at Kent State University has a postdoctoral position available starting in Summer or Fall of 2018 to be supervised by Dr. Veronica Dexheimer. The position is for one year, but may be extended one or two more years, depending on the availability of funding. Candidates should have a PhD in physics and a strong background in at least one of the following areas: nuclear physics, particle physics, high energy physics, astrophysics of compact stars, and general relativity.

Interested candidates should send their full CV including publication list and a brief (<1 page) statement of research interests to

[vdexheim@kent.edu](mailto:vdexheim@kent.edu) together with the names and emails of 3 references who may be contacted at a later time for reference letters. Please use the string "Application for postdoc position – SURNAME NAME" in the email subject.

The application deadline is December 15, 2017.

Kent State University, an equal opportunity, affirmative action employer is committed to attaining excellence through the recruitment and retention of a diverse work force. Women, minorities, veterans, and individuals with disabilities are encouraged to apply.

Please forward this information to potentially interested candidates.

With best regards,

Veronica Dexheimer
